1. Introduction

1.1 NSDL Insta Demat Account

NSDL Insta Demat Account is near real-time API / Technical Integration interface between the Broker and NSDL for opening 'NSDL Insta Demat Account' which will be initiated by Broker's application to NSDL authorized system.

1.2 Disclaimer

This interface specification has been prepared for reference of NSDL and is intended to be used by NSDL, its employees and concerned officials of Depository Participants only to facilitate use of interface between the Broker and NSDL for development of 'NSDL Insta Demat Account'. This specification has been prepared on a best effort basis. Despite every effort to avoid errors it is likely that some errors may creep in. NSDL may at its sole discretion modify, alter, delete, add or amend any of the contents of this manual without assigning any reason or prior intimation. It is notified that NSDL shall not be responsible for any damage or loss of action to anyone, of any kind in any manner arising by the use of this interface specification document.

Important Note

This technical specification document is of confidential nature which has been prepared for reference/guidance of the Broker and is intended to be used by the Broker to facilitate technical integration, development and use of the NSDL's product– 'NSDL Insta Demat Account'. The document should be circulated to only internal stakeholders of the Broker of concern and should not be circulated to external or any third party. Broker is requested to strictly adhere to it, failing which will lead of breach of confidentiality and NSDL will reserve the right to withdraw the product facility.

2. Technical Integration Requirements

2.1 Transaction flow for NSDL Insta Demat Account Opening

The transaction flow will be as follows:

1. Client will login to Broker's application for opening account.

Broker will initiate server to server Order Request API with all mandatory Client details/fields to open demat account directly at NSDL Depository System through API call.

2. Post successful validation of Order Request API, Client will receive a SMS from NSDL on their mobile number (*forwarded by the Broker to NSDL*) that their request for demat account has been registered along with the Client ID details.
3. On activation of demat account, NSDL will send email / SMS / any other mode of communication to Client on successful opening of 'NSDL Insta Demat Account'.

2.2 Processing of NSDL Insta Demat Account and Updating Local DPM

NSDL application will update the Local DPM system near real-time with Demat account details allocated to client by updating the Local DPM Client Master record.

3. eServices Insta Initiation

3.1 Integration Methods

The Broker will initiate the request for NSDL Insta Demat Account Opening as API using HTTPS POST method.

3.1.1 Order Request API

The Order request method is server to server API call to create demat account directly at NSDL Depository System through API call and in response will return or will receive the transaction reference number, Client ID, status and all other relevant details that was received from Broker's API order request.

Request with Nomination details and joint holders with NRI primary account holder

The invocation semantics for the Order request with nomination details is provided below [JSON Structure]:

Production URL : <https://eservices.nsdl.com/client-service/v5/instaDemat/{RequestorId}/order>

UAT URL : <https://eservices-test.nsdl.com/client-service/v5/instaDemat/{RequestorId}/order>

Method: POST

Content-Type: application/json

Transaction-Type:IDD

Requestor:OBC

Request-Reference:DIR00012

Request-Time:2020-06-24T08:23:47+0530

Success-Url: http://nsdl.uat.com/exampleSuccess

Fail-Url: http://nsdl.uat.com/exampleFail

Header Elements of Order Data

Sr. No.	Data element	Type	Length	Mandatory	Description
1	Transaction Type	Char	3	Yes	Value = IDD (for Insta Direct DEMAT)
2	Requestor	Char	20	Yes	Name of the requestor [i.e. BrokerDP]
3	Requestor Id	Char	8	Yes	ID allocated to the requestor by NSDL
4	Request Reference	Char	16	Yes	Unique reference number allocated to this request by the Broker
5	Request Time	Char	24	Yes	Timestamp when the request has been forwarded to eServices website Sample: 2019-04-26T10:42:01+0530
6	Digital Signature	Char	Vary	Yes	Digital signature of the payload. The digital signature should be valid and Class 2 issued for Business/Organisation purpose, which is issued by Licensed Certifying Authorities (CAs) approved by Controller of Certifying Authorities(CCA)
7	Success url	Char	50	No	URL which should be called by NSDL eServices Insta website in case of success callback response
8	Failure url	Char	50	No	URL which should be called by NSDL eServices Insta website in case of failure callback response.

Structure of Order Data Json Attributes

Sr. No.	Data Element	Data Type	Size	Data Field class	Comment
	Primary Beneficiary details - Broker to provide details of the Primary Beneficiary in the below structure.				
1.	Name	Char	45/135	M	Client First Name. In case of field length upto 45, existing Local DPM System version will be applicable. In case of more than 45 and up to 135, DP will be required to upgrade the DPM system version and back office system to accommodate additional field length.
2.	Short Name	Char	16	M	Client short name as decided by the Broker/Client.
3.	DOB	Char	8	M	Client DOB with YYYYMMDD format.
4.	Aadhaar	Number	12	O	-
5.	PAN	Char	10	M	Client's PAN detail
6.	DDPIID	Numeric	6	O	Demat, Debit and Pledge Instruction.
7.	Mobile number	Char	10 /13	M	Client's Mobile number. If Client Type is 1 (for Resident Ordinary), then Mobile Number should be 10 digits only. If Client Type is 4 (for NRI), then Mobile Number can be maximum of 13 digits.
8.	Email Address	Char	50	M	Client's email ID

9.	Client Option to receive e-Statement/NSDLCAS	Char	1	M	Broker will send ☐ 'P' if Client chooses to receive NSDL-CAS in physical form ☐ 'E' if Client chooses to receive NSDL-CAS in electronic form eServices Insta application will validate and ensure that if 'E' is opted. However, in both the above cases, the email address must be available.
10.	Signature	Base64		M	Client Signature is base64 encoded. In case the size of the signature is more than 97 kb, then DP will be required to upgrade the DPM system version and back office system to accommodate higher size signature field length
11.	Address Type	Char	1	M	1-Correspondence 4-Permanent If permanent address is present then address type is mandatory and the Permanent Address Line 1 should be mandatory. 2-Bank Address.
12.	Correspondence Address Line 1 (Local)	Char	36/55	M	In case the Client address in each line is 36, then the existing DPM System version will be applicable. In case of above 36 and upto 55, the DP will be required to upgrade the DPM system version and back office system to accommodate additional field length.
13.	Correspondence Address Line 2	Char	36/55	O	Client Address line 2
14.	Correspondence	Char	36/55	O	Client Address line 3

	Address Line 3				
15.	Correspondence Address Line 4	Char	36/55	O	Client Address line 4
16.	Correspondence Zip Code	Char	10	M	Client Address Zipcode/pincode
17.	Permanent Address Line 1	Char	36/55	O	In case the Client address in each line is 36, then the existing Local DPM System version will be applicable. In case of above 36 and upto 55, the DP will be required to upgrade the DPM system version and back office system. If permanent address is present then address type is mandatory and the Permanent Address Line 1 should be mandatory.
18.	Permanent Address Line 2	Char	36/55	O	Client Address line 2
19.	Permanent Address Line 3	Char	36/55	O	Client Address line 3
20.	Permanent Address Line 4	Char	36/55	O	Client Address line 4
21.	Permanent Address Zipcode	Char	10	M	Client Address zipcode/pincode
22.	Bank Account Number	Char	30	M	Client's bank account number should be minimum 8 and maximum 30 digits
23.	Bank Name	Char	100	M	Bank Name. By default, the name of the Partner Bank
24.	IFSC	Char	11	M	IFSC code of the Bank
25.	MICR	Char	9	O	MICR Code
26.	Bank Account Type	Number	2	M	Bank account type (saving or current) 10 – Savings 11 – Current

27.	Bank Address Line 1	Char	36/55	M	In case the Bank address in each line is 36, then existing Local DPM System version will be applicable. In case of more than 36 and upto 55, the DP will be required to upgrade the DPM system version and back office system to accommodate additional field length.
-----	---------------------	------	-------	---	---

28.	Bank Address Line 2	Char	36/55	O	Bank address line 2
29.	Bank Address Line 3	Char	36/55	O	Bank address line 3
30.	Bank Address Line 4	Char	36/55	O	Bank address line 4
31.	Zipcode	Char	10	M	Bank address zipcode/pincode
32.	Family Mobile Flag	Char	1	M	-
33.	Family Email Flag	Char	1	M	-
34.	Nomination Option	Char	1	M O / M	For Single Holders <u>By default 'N'. In case the client wishes to nominate please set this field as 'Y'</u> By default 'N'. In case the client wishes to nominate please set this field as 'Y' For Joint Account Holders <u>If client does not wish to nominate, please set this field as 'N'</u> <u>In case the client wishes to nominate please set this field as 'Y'</u> <u>If no nomination, this field can be blank as well.</u>No In case of Joint Holders client can skip the Nomination Option.
35.	Father or Husband Name	Char	45	M	-

36.	dp Id	Numeric	8	M	DP Id 8 digit numeric unique value
37.	client ID	Numeric	8	M	Client id 8 digit numeric unique value
38.	Distribute Equally	Char	1	M	'Y' – indicates system will equally distribute share across all nominees, any decimal factor would be added on to the first nominee. 'N' – indicates manual share allocation to all nominees. Total should be 100%.
39.	Number Of Nominees	Number	1	M	Number of nominees. If Nomination Option is 'Y', Minimum number of nominees is 1. Max allowed is 3.
40.	seqNo	Number	1	O/M	Sequence Number. If Nomination Option is "Y", this field is mandatory.
41.	Nominee Name	Char	45	O/M	Name of the Nominee. If Nomination Option is "Y", this field is mandatory.
42.	Relationship with Nominee	Char	45	O/M	Relationship with Nominee. If Nomination Option is "Y", this field is mandatory. Relationship Code to be used are as below: 00-Spouse 01-Son 02-Daughter 03-Father 04-Mother 05-Brother 06-Sister 07-Grand Son 08-Grand daughter 09-Grand father 10-Grand mother 11-Son's wife 12-Daughter's husband 13-Father-in-Law

					14-Mother-in-Law 15-Others <u>16-Not Provided</u> <u>17-Brother-In-Law</u> <u>18- Sister-In -Law</u> <u>19-Default</u>
--	--	--	--	--	---

43.	Nominee Address Type	Char	1	O/M	If Nomination Option is “Y”, this field is mandatory. 3- First Nominee 7 - Second Nominee Address. 9 - Third Nominee address.
44.	Nominee Address Line 1	Char	36/55	O/M	Nominee Address line 1 If Nomination Option is “Y”, this field is mandatory. In case the Nominee address in each line is <u>less than</u> 36, then the existing Local DPM System version will be applicable. In case of above 36 and upto 55, the DP will be required to upgrade the DPM system version and back office system.
45.	Nominee Address Line 2	Char	36/55	O	Nominee Address line 2
46.	Nominee Address Line 3	Char	36/55	O	Nominee Address line 3
47.	Nominee Address Line 4	Char	36/55	O	Nominee Address line 4
48.	Nominee Address zipcode	Char	10	O/M	Nominee Address zipcode/pincode If Nomination Option is “Y”, this field is mandatory.

49.	Nominee city	Char	45	O/M	Name of the Nominee City If Nomination Option is “Y”, this field is mandatory.
50.	Nominee statecode	Char	20	O <u>/M</u>	For State Code refer list <u>If Nomination Option is “Y”, this field is mandatory.</u>
51.	Nominee countrycode	Char	20	O <u>/M</u>	India – 356 <u>If Nomination Option is “Y”, this field is mandatory.</u>
52.	Nominee Mobile Number	Char	13	O <u>/M</u>	If Client is Resident Ordinary, then Mobile Number should be 10 digits only. If Client is NRI, then Mobile Number can be maximum of 13 digits.
53.	Nominee Email Id	Char	50	O <u>/M</u>	Nominee’s email id
54.	Share of Nominee	Number	5	O/M	If Nomination Option is “Y”, this field is mandatory and if Share Equally field is also set as “Y”, Share of Nominee field should be null. <u>Up to 2 Decimals are acceptable.</u>
55.	Nominee Identification - Pan	Char	10	O <u>/M</u>	Nominee PAN number <u>Any one of the nominee identifiers is mandatory</u>
56.	Nominee Identification - Aadhaar	Char	12 4	O <u>/M</u>	Nominee Aadhaar <u>last 4 digits.</u> <u>Any one of the nominee identifiers is mandatory</u>
57.	Nominee Identification – <u>Savings Bank A/c NoDriving Licence.</u>	Char	30 15	O <u>/M</u>	Nominee <u>Bank Savings Account Number Driving Licence Number</u> <u>Any one of the nominee identifiers is mandatory</u>

58.	Nominee Identification – Demat Account – Passport	Char	<u>20</u> <u>8</u>	O / <u>M</u>	Nominee De <u>Any one of the nominee identifiers is mandatory mat account Passport.</u>
59.	Minor Nominee	Char	1	O/M	If Nomination Option is “Y”, this field is mandatory. Default ‘N’. ‘Y’ indicates nominee is minor.

60.	Nominee Date of Birth	Char	8	O/M	Nominee date of birth in YYYYMMDD format. <u>If nominee is minor</u>
61.	Guardian Name	Char	45	O/M	If Nomination Option is “Y”, this field is mandatory. If nominee is Minor, Guardian Name is mandatory.
62.	Guardian Address Type	Char	2	O/M	If Nomination Option is “Y”, this field is mandatory. If nominee is Minor, 6- First minor nominee’s guardian address 8- Second minor nominee’s guardian address 10- Second minor nominee’s guardian address
63.	Guardian Address Line 1	Char	36/55	O/M	If Nomination Option is “Y”, this field is mandatory. If nominee is Minor, Guardian Address line 1

64.	Guardian Address Line 2	Char	36/55	O	If Nomination Option is “Y”, If nominee is Minor, Guardian Address line 2
65.	Guardian Address Line 3	Char	36/55	O	If nominee is Minor, Guardian Address line 3
66.	Guardian Address Line 4	Char	36/55	O	If Nomination Option is “Y” If nominee is Minor, Guardian Address line 4
67.	Guardian Address statecode	Char	20	O	If nominee is Minor, For State Code refer list
68.	Guardian Address country code	Char	20	O	If nominee is Minor, Guardian countrycode India – 356
69.	Guardian Address zipcode	Char	10	O/M	If Nomination Option is “Y”, this field is mandatory. If nominee is Minor, Guardian Address zipcode/pincode
70.	Guardian Mobile No.	Char	10	O	If Nomination Option is “Y”, and nominee is Minor, Guardian mobile number
71.	Guardian Email Id	Char	10	O	If Nomination Option is “Y” and nominee is Minor, Guardian email id

72.	Guardian Relationship	Char	45	M	If Nomination Option is “Y”, this field is mandatory. If nominee is Minor, Relationship of Guardian with Nominee. Relationship Code to be used are as below: 00-Spouse 01-Son 02-Daughter 03-Father 04-Mother 05-Brother 06-Sister 07-Grand Son 08-Grand daughter 09-Grand father 10-Grand mother 11-Son’s wife 12-Daughter’s husband 13-Father-in-Law 14-Mother-in-Law 15-Others
73.	Guardian Identification Details – Pan	Char	10	O	Pan No as Guardian Identification details
74.	Guardian Identification Details – Aadhaar	Char	12	O	Aadhar as Guardian Identification details
75.	Guardian Identification Details – Savings Bank Account No.	Char	30	O	Savings Bank Account as Guardian Identification details
76.	Guardian Identification Details – Demat Account Id	Char	16	O	Demat Account as Guardian Identification details

77.	Occupation	Number	1	M	Code	Desc
					Service	1
					Student	2
					Housewife	3
					Landlord	4
					Business	5
					Professional	6
					Agriculture	7
					Others	8
78.	City	Char	45	M	Name of the City	
79.	State Code	Char	45	M	For State Code refer list	
80.	Country Code	Char	45	M	India – 356	
81.	PAN Flag	Char	1	M	With effect from April 1, 2022, the flag must be passed as 'Y' or 'B' (<i>exempt categories</i>), as the case may be in the Order Request API. In case the changes are made, please inform us in advance	
82.	Gross Annual Income	Char	2	M	Y	PAN verified and seeded with Aadhaar
					B	PAN verified and seeding with Aadhaar not required
					01	Below 1 Lac
					02	1-5 Lacs
					03	5-10 Lacs
					04	10-25 Lacs
					05	More than 25 Lacs
83.	Gender	Char	1	O	Values 1-Male 2-Female 3- Transgender	

84.	Mode Of Operation	Number	1	O/M	Optional in case of single account holder. Mandatory in case of joint account holders. Values: 1 - Jointly 2 - Anyone of the holder or survivor. 3 - First Named Holder only.
85.	Communication To Be Send	Number	1	O/M	Optional in case of single account holder. Mandatory in case of joint account holders. Values : 1 - First holder 2 - All joint account holders
86.	Joint Holder Sequence No	Number	1	O/M	Sequence Number. If Joint account holders are specified, this field is mandatory. Sequence no.2 will have Joint Holder 1 details and Sequence no 3 will have details of Joint Holder 2.
87.	Joint Holder Name	Char	45	O/M	Joint Holder Name. If Joint account holders are specified, this field is mandatory.
88.	Joint Holder Pan	Char	10	O/M	Joint Holder Pan. If Joint account holders are specified, this field is mandatory.
89.	Joint Holder Pan Flag	Char	1	O/M	Joint Holder Name. If Joint account holders are specified, this field is mandatory. Values will be either Y or B. Y - PAN verified and seeded with Aadhaar B - PAN verified and seeding with Aadhaar not required

90.	Joint Holder Date Of Birth	Number	8	O/M	Joint Holder Date Of Birth. If Joint account holders are specified, this field is mandatory. DATE FORMAT: YYYYMMDD
91.	Joint Holder Mobile Number	Numeric	13	O/M	Joint Holder Mobile Number. If Joint account holders are specified, this field is mandatory. . If Client is Resident Ordinary, then Mobile Number should be 10 digits only. If Client is NRI, then Mobile Number can be maximum of 13 digits.
92.	Joint Holder Email Id	Char	50	O/M	Joint Holder Email Id. If Joint account holders are specified, this field is mandatory.
93.	Joint Holder SMS Facility	Char	1	O/M	Joint Holder SMS Facility. If Joint account holders are specified, this field is mandatory. If mobile number present, flag can be 'Y' or 'N'. Else Space. If SMS flag is 'Y', then mobile number is mandatory
94.	Client Type	Integer	2	O	Default="1" for Resident For NRI = "4"
95.	Client Sub type	Integer	2	O	Default="1" for Ordinary. For Client Type ="4", client subtype values are : 01 - NRI - Repatriable 02 - NRI NonRepatriable 03 - DR 04 - NRI-Repatriable-Promoter 05 - NRI NonRepatriable - Promoter
96.	RBI Reference No.	Char	50	O/M	Mandatory if client type is not default.
97.	RBI Approval date	Date	8	O/M	Mandatory if client type is not default.

					Date format – YYYYMMDD.
98.	Periodic Statement	Char	3	M	Mandatory Values: NM / REG

STATE CODE	STATE NAME
1	JAMMU AND KASHMIR

37	ANDHRA PRADESH (NEWLY ADDED)
38	LADAKH (NEWLY ADDED)

* The State code for erstwhile UT of Daman and Diu was 25, prior to 26th January 2020.

Additional fields that will be assigned as default values and updated in Local DPM System:

Sr. No	Client Account Creation- Fields with Default Values	Values
1	Address preference flag	Y (means Local)
2	Standing Instruction Indicator	Y – Yes
3	Local address present	Y – Yes
4	Bank address present	Y – Yes
5	Nominee/Guardian address present	N-Not present, Y- In case it is present
6	Minor Nominee's Guardian Address present	N-Not present, Y- In case it is present
7	Auto Pledge Indicator	N-No
8	No Nomination Flag For first holder	Y – Yes / N As the case may be
9	Type of NSDL Demat Account	Resident
10	Sub Type of NSDL Demat Account	Ordinary
11	SMS flag	Yes

12	PAN Flag	With effect from April 1, 2022, the flag must be passed as 'Y' or 'B' (<i>exempt categories</i>), as the case may be, in the Order Request API. In case the changes are made, please inform us in advance <table><tr><td>Y</td><td>PAN verified and seeded with Aadhaar</td></tr><tr><td>B</td><td>PAN verified and seeding with Aadhaar not required</td></tr></table>	Y	PAN verified and seeded with Aadhaar	B	PAN verified and seeding with Aadhaar not required
Y	PAN verified and seeded with Aadhaar					
B	PAN verified and seeding with Aadhaar not required					
13	Receive Annual Reports, AGM Notice in physical form	N. In case email is not present then the flag will be enabled				
14	Aadhaar Verified /Not Verified flag	Y or N – to be mentioned by the DP during on-boarding to the production system				

3.2 Security and Authentication

Service Security:

The parameter used for authenticating the request includes

Requestor Id	Issued by NSDL to Broker DP Access granted to Requestor ID to invoke the service
Transaction Type	List of valid transaction types Access granted to Requestor ID to the designated transaction type
Digital Signature	The data payload to be signed using DP digital Signature and computed HASH value sent part of payload for verification Following validation will be performed: 1. Certificate Trust verification 2. Certificate Expiration 3. Certificate Revocation Check 4. Certificate Serial Number Validation 5. Hash Check with Payload data

Channel Security: Channel to be secured using HTTPS POST call (SSL 128 bit).

3.3 Input data validations

3.3.1 Order Request Data Validation [received via server to server Order Request API]

Validation details for each record in the instruction set (reference Instruction Detail input data element) are listed in table below:

Sr. No.	Data Element	Validation
1.	Name	Should not be empty
2.	Short Name	Should not be empty
3.	PAN	PAN Syntax validation. (first 5 alphabets, next 4 digits and last alphabet)
4.	Address Type	Should be '1' [Correspondence-Local] Should be '2' [Bank] Should be '4' [Permanent]
5.	Correspondence Address Line 1	Should not be null
6.	Permanent Address Line 1	Should not be null in case the Address Type is present ["4"]
7.	Bank Account Number	Should not be null
8.	Bank Name	Should not be null
9.	IFSC	Should not be null
10.	Bank Account Type	Should be provided by the Broker
11.	Bank Address	□ Should be '2' □ Should not be null
12.	Mobile Number	Should not be null
13.	Email Address	Email syntax validation

On Order Request Data validation failure, the request will be rejected.

Once the validation is successful then response will be sent back with transaction reference number, Client ID (received from the broker in request), Status and other details. This will be the final response which will complete the transaction for order request sent by the Broker. Further, there will be a check request status API(Ref Section 3.5) that can be used by Broker at any point of time (say, if there is no response received) to get the status/details of the transaction by providing the Broker's Request Reference Number.

3.5 Check Request Status in case of no response

In case of no response or timeout, the Broker can enquire the status of the request using status check API which will be provided by eServices Insta website. The Request details with nomination details and single account holder are described as below:

Broker-DP Request

Production URL :- [https://eservices.nsdl.com/client-service/v5/instademat/\\${REQUESTORID}/orders/\\${BROKERREQUEST-REFNO}](https://eservices.nsdl.com/client-service/v5/instademat/${REQUESTORID}/orders/${BROKERREQUEST-REFNO})

UAT URL: - [https://eservices-test.nsdl.com/client-service/v5/instademat/\\${REQUESTORID}/orders/\\${BROKERREQUEST-REFNO}](https://eservices-test.nsdl.com/client-service/v5/instademat/${REQUESTORID}/orders/${BROKERREQUEST-REFNO})

Method: GET Header:

Content-Type: application/json

transactionType: IDD requestor: XYZ

Broker

requestTime: 2019-04-26T10:42:01+0530

digitalSignature": "<Partner Broker-Signature-Detail>"

NSDL Response:

Header: transactionType:

}
```

4. Other requirements

1. The DP ID of the DP will be configured during the on-boarding process of the Client.
2. The DP will have to avail the pre-generated Client ID facility.
3. Activation of the Account:
 - a) On the weekdays (*between Monday and Friday*), though the Client ID in registered status will be displayed to the Client instantly, there will be a lag time in activating the demat account between the end of the day (EOD) and beginning of day (BOD) system processes, which may be for around 2 hours, likely between 10 pm and 12 am. The Client account may be activated in the BOD i.e., between 12.00 am to 1.30 am, subject to completion of normal/ regular system processes as per schedule.
 - b) Between Saturdays EOD i.e., after 4.30 pm and till Monday BOD i.e., 12 am or 1 am, though the Client ID in registered status will be displayed to the Client instantly, the Client account will be activated in the BOD of Monday.
 - c) On any NSDL Depository Module system holiday, though the Client ID in registered status will be displayed to the Client instantly, however, the account will be activated on the subsequent business day's BOD.
 - d) In all the above cases, suitable message will be displayed to the Client on the e-Services Insta website. Further, NSDL system will be up and running/working on all the bank/trading holidays falling on the weekdays or Saturdays.
4. NSDL will send the Client Account details to the Client electronically at their registered email address. Client will also be intimated through SMS about activation of 'NSDL Insta Demat Account'. NSDL will also explore the option of sending the details on whatsapp or other messaging platform.

5. This facility is applicable only for sole holder i.e., individual (Type-Resident and Sub-Type Ordinary) in the first phase for opening of demat account.
6. Broker will also provide the signature image of the Client in base 64 format, extracted from the CBS. In case the signature is not provided by the Broker-DP or for any other reasons the signature provided is not processed, then the same will be required to be uploaded separately into DPM system. Till such time, the account will be in 'Registered' status at NSDL depository system. For activating the account, NSDL will provide a signature upload utility to facilitate upload of signature in base 64 format.

5. Exception Handling

Response Status Code description (transactions)

S. No	Account Status	Description
1	00	Account Active
2	02	Account Registered
3	98	Capture Validation Failure
4	99	Rejected by NSDL
5	03	Account Suspended
6	04	Account Closed

Error Fields Definition

Data Element	Data Type	Size	M/O	Comment
status	Numeric	3	M	Error code
message	Character	50	M	Please refer below table
Error	Character	50	M	Please refer below table

Http status code reference [Error code]

Sr. No	HTTP status code	Description
1	200	Response worked as expected
2	400	Bad request: Missing a field or invalid field.
3	500, 502, 504	Internal NSDL error.
4	401	Authentication Error. Digital Signature invalid
5	404	Not Found

Kindly note that in case the request is originating from Mobile or Tab, there will no changes/differences with respect to the response status or error code sent by NSDL to the Broker.

6. Appendix

6.1 Appendix -1 Digitally Signed HTTP Requests

Using a private key /digital certificate, Broker can digitally sign the HTTP requests that are sent between NSDL and Broker DP HTTP server. This ensures:

- **Authenticity:** only the sender that has the private key (Broker) can send valid HTTP(S) messages to the NSDL.
- **Message integrity:** with this approach, requests are protected from a man in the middle attack where the messages get distorted.

Creating a Signature

In order to create a signature, a client MUST:

- Use the contents of the HTTP message, the `headers` value, and the Signature String Construction algorithm to create the signature string.
- The `algorithm` and key associated with `Requestor-ID` must then be used to generate a digital signature on the signature string.
- The `algorithm` value is "SHA256WithRSA". This means that the data associated with `Requestor-ID` is an RSA Private Key (as defined in RFC 3447), the signature string hashing function is SHA-256.
- The `signature` is then generated by base 64 encoding the output of the digital signature algorithm
- "Digital-Signature" data to be created by signed data in detached format (using certificate + data), it should not contain the data embedded in signature which ensures that the http header size is not huge.
- Make sure the Digital Signature string doesn't involve backslash for escaping quotes, this is to avoid string processing complications.

e.g. 1 - Order data String to be formed for signing:

```

Verifying a Signature

In order to verify a signature, a server MUST:

- Use the received HTTP message, the `headers` value, and the Signature String Construction algorithm to recreate the signature string.
- The `algorithm`, `Requestor-Id`, and base 64 decoded `signature` listed in the signature parameters are then used to verify the authenticity of the digital signature.
- The `algorithm` value is "SHA256WithRSA". This means that the data associated with `Requestor-Id` is an RSA Private Key (as defined in RFC 3447), the signature string hashing function is SHA-256

6.2 Appendix -2 Abbreviations, Definitions, Synonyms

Abbreviation/ Acronym	Description
NSDL	National Securities Depository Limited
DP	Depository Participants
API	Application Programming Interface
MITC	Most Important Terms and Conditions
DPM	Depository Participant Module –A NSDL Application for serving DP
OTP	One time Password
URL	Uniform Resource Locator
JSON	JavaScript Object Notation is a lightweight format for storing and transporting data
RSA	RSA algorithm is asymmetric cryptography algorithm. Asymmetric actually means that it works on two different keys i.e. Public Key and Private Key
